

Inside A Chicken Egg

This is a chicken egg.

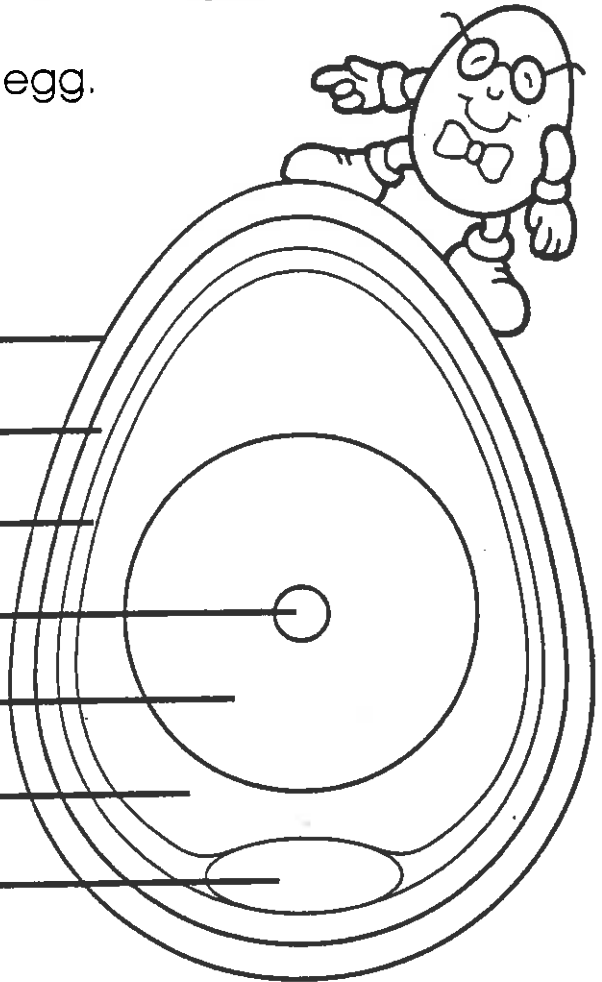

A baby chick can grow inside the egg.

Look at the picture of the egg.

Color the parts.

eggshell _____
outer membrane _____
inner membrane _____
embryo _____
yolk _____
albumen _____
air pocket _____

The **eggshell** protects the inside of the egg.

Color the eggshell brown.

The **two membranes** protect the insides, too.

Color the membranes blue.

The **albumen** keeps the embryo moist.
Leave the albumen white.

The **yolk** provides food for the growing embryo.

Color the yolk yellow.

The **embryo** grows into a chick.

Color the embryo red.

The **air pocket** holds air that the chick will breathe just before hatching.
Leave the air pocket white.
